

## Sprint 4 start meeting

6/10-2021

- Focus on the database this sprint?
- Change DoD so it fits testing
- Designated testers each sprint?
- Clear review criterias

### **Changes for sprint 2**

The group would like to use JUnit testing for this sprint to compensate for the DoD testing, and also establish some rules or guidelines to follow during PR.

Guidelines: <https://google.github.io/styleguide/javaguide.html>

DoD will be a document within itself:

[https://docs.google.com/document/d/1tCvyqr8J6AfhJYdRe4-wFXH\\_ljItmeoXlZjqNMaXzwU/edit?usp=sharing](https://docs.google.com/document/d/1tCvyqr8J6AfhJYdRe4-wFXH_ljItmeoXlZjqNMaXzwU/edit?usp=sharing)

The group will create a document outlining in detail the MVC pattern and how it integrates in the project code.

If Unit testing is implemented correctly by every tester, the PR testing process will be automated and easier to do. The group thinks it has been going well with the automated assigned PR and would like to continue to do so.

The group has questions regarding when the project has to be done. Ramza will email Pontus to get clarifications regarding this.

The group has agreed to redo the database using Room API which will be assigned to 2 people. The later installation of Unit testing of code has made it difficult for the group to implement retroactively. The group has agreed to put user story 21 in the backlog for now since we lack the proper resources to implement it for all existing code and future code.

Add user story for choosing distance short/medium/long

Add user story for "i give up" button for routes

### **Priority for this sprint:**

- User story 9

**Tasks for sprint 4:**

**Erik:** 9.1, 9.2, 9.3

**Joakim:** 9.1, 9.2, 9.3

**Molly:** Standby(9.1, 9.2, 9.3), 1

**Daniel:** 28, 25

**Valeria:** 27

**Ramza:** 27
