

- What do I want to learn or understand better?
- how can I help someone else, or the entire team, to learn something new?
- what is my contribution towards the team's use of Scrum? what is my contribution towards the team's deliveries?

This week I was still not sure if I was going to continue working with the team on this project. However I decided to let the team know my situation and even though I didn't know if I would continue they gave me the role as a scrum master as I wished.

I want to learn and read more on what the scrum master role is to be used for. At the moment we have only decided that my role in the future is to make sure the group members follow everything written in the social contract that we all wrote together and agreed on. I do believe there is more to this role and I'm willing to find out more about what and how I can contribute more to the group with my role as a scrum master.
