

## **Sprint 5 start meeting**

### **13/10-2021**

#### **Changes for sprint 5:**

Report & presentation: who, what, when

- Make a team reflection for sprint 4
- Should discuss points in team reflections for end meeting
- - first two points today then the last 2 ones for next end meeting.

Next sprint is last sprint: Put all resources on finishing the fundamental parts of the app that isn't done.

#### **Notes from today's meeting with teachers: they are for the final report**

- Final report questions to think about: what have you learned, what worked/what didn't work, was it a disaster/what was a disaster,
- Shared understanding of the software
- Making sense: enough details for someone who wasn't there to understand
- **Read me file:** who's who, structure, git info, link to scrum board(if you used trello for example), link to drive,src, reflections, weekly/individual reflections, App(prototype)

Go through Social Contract once more  
assign team reflection work

Presentation: 5-10 minutes. We can choose who will participate. What we have created so the teachers can understand what we have created. Summary of the product and the work that has been done. Shorter presentations the teachers will give feedback. Erik would rather skip. Daniel would rather skip public speaking but wants to help with the presentation, and can answer questions if necessary. Ramza wants to partake. Molly wants to partake. Joakim would rather skip public speaking but wants to help with the presentation. Valeria: unanswered.

Molly will try to make the app run on her s21 android phone tomorrow.  
Molly will look for achievement triggers for Erik.

Social contract: hand in prev team reflections in canvas. Tuesday next week a new team reflection should be made

Final team reflections is for sprint 6

Added user story for: Team reflections and presentation work. Cleanup code.

#### **Priority for this sprint:**

- taking a picture should finish the route.
- Picture should show up on the map (thumbnail).
- Picture should be stored in the database with its location.

- Database optimization.
- Cleanup of the app to make it look more professional. Remove notification from startup of the app.
- PR should be finished.
- Add compile version of app into repo

**Tasks for sprint 5:**

**Daniel: 30.1, 30.2, 29,**

**Joakim: 30.1, 30.2, 9.3, TeamReflections week3,**

**Erik: 31, 9.3, PR#26, PR#28,**

**Molly: 30.1, 30.2, PR#25, PR#9.1**

**Ramza: 30.1, 30.2, 27, PR#1,**

**Valeria: 27**
