SPRINT 3 start meeting - 29/9-2021

- Infrastructure of task 9.2 (MVC pattern?)
- JUnit testing of code
- Product owner will review PR and merge them once they are approved
- Discord notification for PR
- template for User story 19
- Discuss support role Erik
- Answer these questions for the team reflection from scale 1-7,
    - 1- so stressed 7- relaxed
    - How do you feel about the tools and technologies you are using?
        - 5, 4,7,7,4,7
    - How do you feel about your ability to define relevant user stories and tasks?
        - 6,5,5,5,4,4
    - How do you feel about what you have accomplished this sprint?
        - 5,4,6,4,4,4
    - How do you feel about working with your team?
        - 7,7,7,7,7,6

Changes for sprint 3

Priority for this sprint:

Task 9.2 needs to be refactored into the MVC pattern. It will be difficult to predict how the object structure and/or database will look without any predetermined structure within the code. Problem with refactoring user stories into MVC pattern since user story 19 isn't finished yet. We should try to split up the user story into several tasks and merge each task individually (for example split to tasks based on functionality. Navigation, camera, notifications etc.).

We should use unit testing for the models. Keep the main part of the business logic in the models, so that a lot of the app functionality is tested in the model. Keep the database separate from the model to simplify testing. Only makes sense after the MVC has been implemented to reduce the workload for the team.

Create a user story to "enforce" the approval of the PO for approved PRs. Either trigger an automation which will ping PO in Discord, or use e-mail for notifications about approved PRs.

Use discord to notify reviewers that their review is requested in PRs. Simpler, faster and better than having to check your e-mail all the time.

The team agrees to skip the template of user story 19 and instead focus on finishing the user story as quick as possible. Open PR today (29/9-21) and get the PR merged by tomorrow (30/9-21).

Erik will take on the role of "team support" for more time consuming questions, for example if team members want to share their screens and figure out why something doesn't work the way it's supposed to, fix merge conflicts, general git/GitHub questions etc. For less time consuming questions, the entire team will be available for questions.

Photo clusters?

Tasks for sprint 3:

Erik: 22, 23, 7, 19
Joakim: 9.2
Molly: 9.2
Valeria: 26, 7, 19
Ramza: 11, 10
Daniel: 24, 25, 5
