- what do I want to learn or understand better?
- how can I help someone else, or the entire team, to learn something new?
- what is my contribution towards the team's use of Scrum?
- what is my contribution towards the team's deliveries?

I want to better understand how KPI's work.
I can help someone else by encouraging active communication between team members to ensure that everyone is up to date in their work and help resolve any issues or questions.
My contribution to the teams use of Scrum is creating documents for all the sprint meetings and taking an active roll in the meetings.
My contribution to the teams deliveries is completing task 3.1 and participating in code reviews.
